## 1 · DUAL SCORING BY MARKET MATURITY

### YIELD & STABILITY

>60% of all-time transactions are ready/secondary. Established districts with rental benchmarks and multi-year price history. Mirrors MSCI/IPD total-return logic.  
e.g. Khalifa City, Al Reem Island

### GROWTH & EARLY-CYCLE

<40% of all-time transactions are ready — predominantly off-plan. Mirrors CBRE/PGIM emerging-market logic: demand velocity, developer confidence, forward appreciation.  
e.g. Al Hidayriyyat, Al Jubail Island

## 2 · YIELD & STABILITY — FACTOR WEIGHTS

|                                    |               |                                                                                                                                                                                                                                                                                                                                                |
|------------------------------------|---------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Price Momentum (ready only)</b> | <b>30 pts</b> | <ul style="list-style-type: none"> <li>• <b>Statistical explanation:</b> % change in median AED/sqft for ready/resale transactions, last 12m vs prior 12m. Off-plan excluded.</li> <li>• <b>Plain English:</b> Are prices going up? Compares price per sqft this year vs last year for completed homes. Bigger rise = more points.</li> </ul>  |
| <b>Gross Rental Yield</b>          | <b>25 pts</b> | <ul style="list-style-type: none"> <li>• <b>Statistical explanation:</b> Median ADREC-registered annual rent ÷ median sale price. &gt;8% → 25 pts; 6–8% → 22; 4–6% → 16; 2–4% → 8.</li> <li>• <b>Plain English:</b> How much rent does a landlord earn vs what they paid? Higher rent relative to purchase price = more points.</li> </ul>     |
| <b>Liquidity</b>                   | <b>20 pts</b> | <ul style="list-style-type: none"> <li>• <b>Statistical explanation:</b> Transactions last 3m ÷ avg 3m over prior 9m. Log-scaled to prevent outliers dominating.</li> <li>• <b>Plain English:</b> How easy is it to buy or sell? More sales recently vs the past = an active, healthy market.</li> </ul>                                       |
| <b>Price Stability</b>             | <b>15 pts</b> | <ul style="list-style-type: none"> <li>• <b>Statistical explanation:</b> Inverse CoV of quarterly median PSF over 24m — lower variance scores higher. CoV ≤0.05 → 15 pts; &gt;0.30</li> <li>• <b>Plain English:</b> Are prices steady or all over the place? Consistent prices over 2 years score higher — wild swings score lower.</li> </ul> |
| <b>Appreciation Signal</b>         | <b>10 pts</b> | <ul style="list-style-type: none"> <li>• <b>Statistical explanation:</b> Ready median PSF ÷ off-plan median PSF (last 12m). Ratio &gt;1 = completed units trade above off-plan entry.</li> <li>• <b>Plain English:</b> Do finished homes sell for more than off-plan? If yes, the area has proven its value over time.</li> </ul>              |

## 3 · GROWTH & EARLY-CYCLE — FACTOR WEIGHTS

|                              |               |                                                                                                                                                                                                                                                                                                                              |
|------------------------------|---------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Off-Plan Velocity</b>     | <b>30 pts</b> | <ul style="list-style-type: none"> <li>• <b>Statistical explanation:</b> Off-plan transaction count last 6m vs prior 6m. Accelerating ratio = developer launches finding</li> <li>• <b>Plain English:</b> Are developers selling faster? More off-plan sales recently vs 6 months ago = strong buyer demand.</li> </ul>      |
| <b>Off-Plan Momentum</b>     | <b>25 pts</b> | <ul style="list-style-type: none"> <li>• <b>Statistical explanation:</b> % change in off-plan median PSF, last 12m vs prior 12m. Capped ±40%.</li> <li>• <b>Plain English:</b> Are new-launch prices rising? Compares off-plan price per sqft this year vs last year.</li> </ul>                                             |
| <b>Appreciation Signal</b>   | <b>20 pts</b> | <ul style="list-style-type: none"> <li>• <b>Statistical explanation:</b> Same ready/off-plan PSF ratio as Y&amp;S, weighted higher (20 vs 10 pts) in early-cycle markets.</li> <li>• <b>Plain English:</b> Do finished homes sell above their off-plan price? Rarer in new areas, so it carries more weight here.</li> </ul> |
| <b>Developer Activity</b>    | <b>15 pts</b> | <ul style="list-style-type: none"> <li>• <b>Statistical explanation:</b> Unique projects with off-plan registrations last 12m vs prior 12m. Ratio ≥1.5 → 15 pts.</li> <li>• <b>Plain English:</b> Are more developers launching projects? More unique projects vs last year = a growing, competitive market.</li> </ul>      |
| <b>Market Entry Momentum</b> | <b>10 pts</b> | <ul style="list-style-type: none"> <li>• <b>Statistical explanation:</b> Off-plan transactions last 3m vs rolling 3m avg over prior 9m. Ratio ≥1.5 → 10 pts.</li> <li>• <b>Plain English:</b> Is buying picking up right now? More sales in the last 3 months vs the usual pace = momentum building.</li> </ul>              |
